YORKSHIRE FAIRHEAD BRAMLEY FALL QUARRIES.—This Stone, of superior quality, can now be supplied at a very low price, in consequence of the reduced centre of carriage. Cargoes shipped direct from the quarries to London and all parts of the coast.—For application of prices, apply to Mr. BEWICK, Greenmoor, near Whitley, Yorkshire; or to H. G. H. CLARK (London Agent), Iberon Haylor Wharf, Rotherhithe, London.

TO CONTRACTORS, BUILDERS, AND OTHERS.

TO BE DISPOSED OF CHEAP, about 1,000 tons of New Bramley Fall and other STONE, in random size; also a few thousand feet of coping, 1 ft. 4 in. by 9 in. The above (or any portion of it) can be shipped in cargoes and delivered at the river, or any port convenient with immediate despatch.—For price and further particulars apply, by letter or otherwise, to Mr. HORTIMER, 20, Saint Thomas's-street, Borough, London.

ORNAMENTAL CHIMNEY SHAFTS.—About a hundred different patterns and sizes of chimney tops for Gothic, Elizabethan, or Italian buildings are kept in stock.—J. SEELEY, late Austin and Seeley's, Nos. 1 to 4, Keppel-row, New-road.

PAVING, 2s. 9d. per SQUARE YARD.—Basements, Foot-walks, Malt-houses, Corn Stores, Floors of Warehouses, and every description of Pavement laid down at the above low price, and the work guaranteed.—Apply to JOHN PILKINGTON, POLONCEAU'S BITUMEN PAVEMENT OFFICE, MONUMENT CHAMBERS, 14, FISH-STREET-HILL.—N.B. Country Agents and Railway Engineers and Contractors supplied with the best bitumen for covering bridges and arches.

E. and W. STURGE respectfully announce to Builders, Masons and others, that they have made a FURTHER REDUCTION in some of their prices of STONE, &c a list of which they will be happy to forward to the trade on application. Sinks, 1s. 8d. per foot; Paving, 2s. 3d. and 2s.; Slab, &c. E. and W. S. are confident the quality of their goods will give satisfaction, and that their prices will be found very much lower than the usual charges.—Bridge Wharf, City-road-basin.

CHEAP BRICKS!—80,000 Capital RED FACING BRICKS TO BE SOLD, very low, for Cash. Along side, in Barge. Samples may be seen on application to Mr. HOOK, 3 Pine Elms.

BRICKS.—White Suffolk Facing Bricks, Red Facing Bricks, Hard Clinkers for stable paving, &c. &c. and Moulded Bricks to any pattern, of superior quality, and at reduced prices.—Apply to Messrs. ROBERT WRIGHT and SONS, Brick and Tile Manufactory, Woolpit, Suffolk; or to their Agents, W. and S. WRIGHT, Brick and Tile Works, Hanwell, Middlesex.

WHITE BLUNHAM BRICKS and TILES.—These Goods, so justly celebrated for retaining their colour without vegetating, and combining great strength with a fine face, can now be obtained in London, in various forms and sizes, and in any quantity. The Paving Tiles, Clinkers, Splays, Bullnoses, and Facings are well worth attention. Sole Agents: PHILIP HARE and CO. 32, Steel-yard Wharf, Upper Thames-street.

HOOPER'S WHITE BRICKS, moulded for Plinths, Jambs, Chimney-shafts, Wall-copings, at from 4d. to 6d. per foot run; Paving Tiles of different patterns, in white, red, and blue; Fancy Roofing and Ridge Tiles, coloured brown, or fire slate; White Rebate Tiles, for facing buildings, &c. sent to all parts of the country direct from the Atlas.—Office, 3, Portland-street, Southampton, where samples and illustrated price-lists may be had on application, post paid.

WHITE SUFFOLK and RED FACING BRICKS of superior quality. Moulded Bricks to any pattern.

COWLEY, KENT, and ESSEX BRICKS; also Yellow and Pale Malm Seconds, Cutters, Paviors, Shippers, &c. &c.

KENTISH RAG STONE of the finest quality, and of the blue tinge so much approved by architects, can now be supplied, at a FURTHER and CONSIDERABLE REDUCTION in PRICE.

Apply to Mr. BENJAMIN GOUGH, 37, Newington-crescent, Newington Butts.

BRICKS.—H. DODD is enabled to offer his BRICKS, which are of good quality, at the following low prices: and as his fields are only a quarter of an hour's walk from the City, H. D. earnestly requests purchasers will favour him with a visit, in order to inspect his stock and to judge for themselves:—

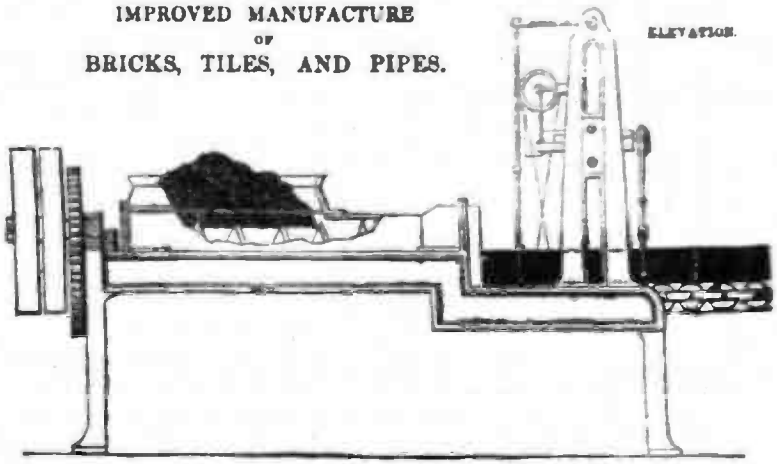
Marls cutters	44s.	Per Thousand.
Yellow seconds	60s.	"
Pale seconds	52s.	"
Paviors	42s.	"
Pickings	30s.	"

Delivered within two miles of the fields.

Marls place, half washed stocks, and place bricks, at equally low prices. These bricks are sound, well burnt, and unusually free from defects; a very large proportion of the stock being suitable for external facing.—Apply to HENRY DODD and CO. at the Counting-house, Hoxton Brickfields, Orange-walk, near the Mary Hoxton. N.B.—Red pit sand of approved quality constantly on sale, upon reasonable terms; this sand, from its not containing any saline matter, is acknowledged to be preferable to river sand.

PAN TILES, 48s.; Plain, 32s. 6d.; superior White Suffolk Facing, Red ditto, Fire Brick, &c.—Best Stourbridge, Welsh, and Newcastle Fire Bricks, Lamps, Tiles, Clay, Windsor Loam, &c. &c. and other shaped Goods, Windsor and Nonsuch Grate Tiles and Bricks, Dutch and English Clinkers, Patent Malt-kiln and Corn drying finely-perforated Tiles, 12 in. and 9 in. Paving ditto, unequalled in quality and colour, at WARD'S old-established Honduras Wharf, Bankside, Southwark, London. Thames Sand, Concrete, Gravel, &c. &c.

RANDELL AND SAUNDERS'S PATENT MACHINE FOR THE IMPROVED MANUFACTURE OF BRICKS, TILES, AND PIPES.



In this machine are combined the two objects so long sought in brick machines—a press which forces the clay through a die without cessation so long as the clay is supplied to the machine, and a perpetual self-acting cutter, which severs the clay the required lengths without interfering with its progress.

The clay, in a rough state, is thrown upon the screws by the person employed to fill the machine; the screws, in revolving thoroughly put the clay, and also force it forwards into a chamber at the other end of the cylinder in which they revolve; from this chamber the clay is allowed to issue through a die, and it is obvious that the stream of clay must take the form of the opening through which it passes, and this opening can be made of the form required to make bricks, tiles, pipes, and other descriptions of ware.

When it is necessary to give the ends of the bricks a corrugated shape, this can be done by attaching a knife to the cylinder of the cutter; this knife revolves with the cylinder, and is made the shape required for the ends of the bricks, which form it imparts to the bricks in cutting them. This arrangement is adapted for making Messrs. RANDELL and SAUNDERS'S Patent Draining Bricks, for sewage purposes, which make a drain of much greater strength than the stoneware or red-ware pipes, and at far less cost.

The machine is self-acting—the attendants have merely to put in the clay, and remove the bricks, or other ware, which may be produced.

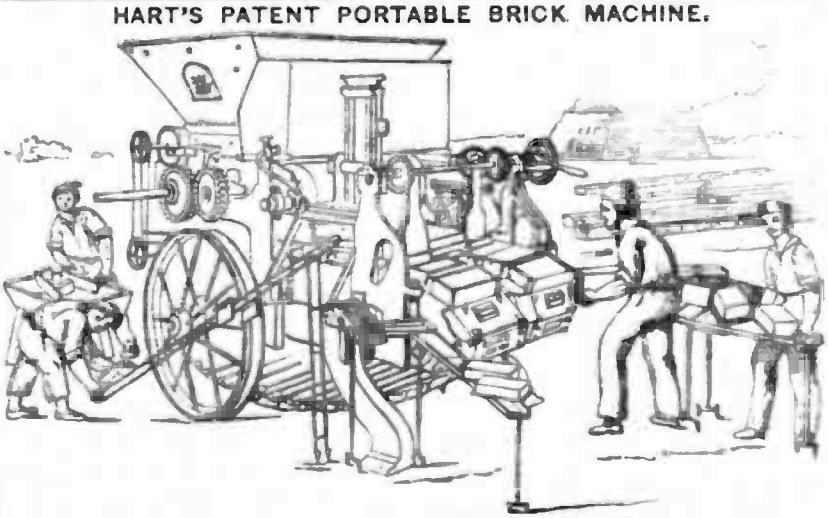
When worked with two-horse power, the machine will produce 1,200 bricks, or 1,200 3-inch pipes, per hour; more power can be applied if desirable, and a larger result obtained.

The screws propel the clay without taking air in with it; thus the ware comes out free from the imperfections which are so often seen in the ware produced by piston presses; and the loss so generally incurred by waste in burning, from the expansion of the air in the ware, is avoided.

The moderate price of this machine, and the simplicity of its construction, place it within the reach of almost every person in the trade, both as to cost and management. It not only lessens the cost of labour required in the process of brick making, but, as the clay can be used in a much drier state than it can be when moulded by the hand, the time occupied in drying is much less; and, when hollow bricks are made, a material saving is effected in the cost of manufacture and burning. In consequence of the great compression given to the clay in its transit, ware of very superior quality is produced.

For price and further particulars apply to RANDELL and SAUNDERS, Bath; CHARLES JOHN CARR and CO. Engineers Belper, Derby; STOTHERT, BAYNO, and PITT, Engineers, Bath; or to FOWLER and PRY, Engineers, Bristol.

HART'S PATENT PORTABLE BRICK MACHINE.

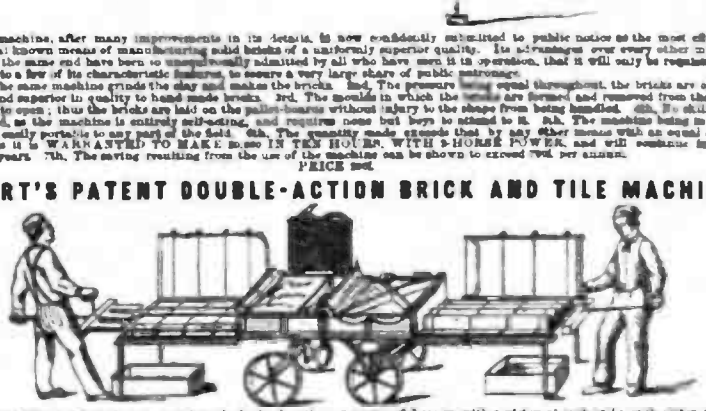


This machine, after many improvements in its details, is now confidently submitted to public notice as the most effective and economical known means of manufacturing solid bricks of a uniformly superior quality. Its advantages over every other machine for attaining the same end have been so unequivocally admitted by all who have seen it in operation, that it will only be requisite to draw attention to a few of its characteristic features, to secure a very large share of public patronage.

1st. The same machine grinds the clay and makes the bricks. 2nd. The pressure being equal throughout, the bricks are of uniform density, and superior in quality to hand-made bricks. 3rd. The moulds in which the bricks are formed and removed from the machine are made to open; thus the bricks are laid on the pallet-boards without injury to the shape from being handled. 4th. No skilled labour is required, as the machine is entirely self-acting, and requires none but boys to attend to it. 5th. The machine being mounted on wheels, is easily portable to any part of the field. 6th. The quantity made exceeds that by any other means with an equal amount of power; as it is WARRANTED TO MAKE 20,000 IN TEN HOURS, WITH 2-HORSE POWER, and will continue in working order for years. 7th. The saving resulting from the use of the machine can be shown to exceed 7s6d. per annum.

PRICE 80l.

HART'S PATENT DOUBLE-ACTION BRICK AND TILE MACHINE.



This machine consists of a worm and toothed wheel, acting on a powerful screw, with a piston at each end; each piston working in the machine, which is capable of containing 2 cwt. of clay at each end.

The machine is entirely of iron, and the construction is so simple, that with ordinary care it will last for years, and WILL BE WARRANTED FOR THREE YEARS. It is mounted on wheels, so as to be readily taken to any part required. The dies are made for tiles and mouldings of any shape and size; for solid or hollow bricks; for pipes of any shape and size up to 6 inches diameter, and with two reciving tables.

N.B.—The dies for Roberts's Patent Hollow Bricks, as exhibited in Prince Albert's Model Cottages in Hyde-park, are manufactured for, and supplied with this machine if required. It is capable of being worked by hand, or may, as well as the Brick Machine, be driven by horse or steam power.

The price of the machine, complete, with two tables, two dies, and one screw, for hand-power	30l.
Ditto, ditto, to be worked by horse-power	35l.
Ditto, ditto, steam-power	35l.

Price of horse-gear to drive one tile machine, 8l.; if to drive two machines, 9l. 10s.; if three, 11l. extra. One horse will drive three machines.

J. H. invites attention to his extensive stock of machinery of every description for brick and tile making, and will furnish full particulars upon application. Steam-engines from four to fifty horse power kept in stock.

ENGINEERING, BOILER MAKING, AND IRON FOUNDRY IN ALL ITS BRANCHES

MANUFACTORY:—ATLAS IRON WORKS, BOROUGH-ROAD LONDON.
